HERE IS THE BEST TRACTOR TYRE FOR your SOIL!

Dunlop "Universal" is the only all-purpose tyre that will stand up to all types of farm work and last for years! The self-cleaning, non-slipping, wider tread gives your tractor all the drawbar power you want—even under adverse conditions, whilst the extra thick, double-toughened rubber lug bars take all the punishment inflicted by stumpy paddocks, rocky outcroppings and hard roads

The new Dunlop "TrakGrip" Tractor Tyre has been produced with deep lug bars to give maximum traction and longer service in black soil, sticky soil, wet clay, mud, green cover crop, etc. "TrakGrip" will pull you through conditions impossible to work before—even with other types of pneumatics. You'll get the last bit of power out of any tractor with this super tough traction giant
